OBJECTIVE

Dynamic Software Tester seeking to leverage expertise in manual and automated testing to enhance software quality. Committed to identifying defects and collaborating with development teams to deliver reliable software solutions. Passionate about continuous improvement in testing processes and staying ahead of industry advancements.

WORK EXPERIENCE

Software Engineer   Aug 1 2022 - Oct 30 2024
Bebo technologies Pvt ltd

- Develop and maintain automated test scripts using Selenium WebDriver with Java.
- Implement TestNG framework for managing test suites and generating reports.
- Design and execute API test cases using Rest Assured and Postman.
- Perform functional, integration, regression, and UAT testing for web applications.
- Execute SQL queries to validate database operations.
- Configure and manage Jenkins pipelines for CI/CD automation.
- Log and track defects using JIRA, collaborating with developers for issue resolution.
- Conduct cross-browser and cross-platform testing for application compatibility.
- Optimize automation scripts for better reusability and maintainability.
- Coordinate with stakeholders to refine test cases and align with project goals.

EDUCATION

Madurai Kamaraj University

Bachelor of Commerce (B.Com) - 60 GPA   2020

Board Intermediate Education

MPC - 63 GPA   2013

Secondary School of education Ap

- 2011 GPA   2011

PROJECT

Vacation Rental Management   Aug'2022 to Oct 2024

- Vacation Rental Management System, a web-based application designed to help property managers efficiently handle vacation rental properties. This system enables property managers to list, update, and manage property details, pricing, availability, and reservations. It includes an integrated CRM for managing customer communications, automated emails, and marketing campaigns. Additionally, it supports real-time booking management, cancellation handling, and custom pricing strategies, improving operational efficiency and customer experience.

SKILLS

Selenium WebDriver ●●●●○   TestNG ●●●●○   Postman ●●●●○
Java ●●●○   Python ●●●●○   Rest Assured ●●●●○

- Testing Tools: Selenium WebDriver, TestNG, JMeter, Postman, PyTest, Rest Assured
- Languages: Java, Python, SQL
- Manual Testing: Functional, Integration, Regression, UAT Testing

- Automation: Selenium WebDriver, TestNG, PyTest, Rest Assured
- Database: Profcient with MySQL
- Bug Tracking: Experienced with JIRA, able to utilize REST API for test automation
- Frameworks: Familiar with Maven, JUnit, TestNG, Allure
- Web Technologies: Knowledgeable in HTML, CSS, JavaScript
- Version Control: Profcient with GIT
- Build Tools: Experienced with Maven and Jenkins
- Methodologies: Agile, Waterfall
- Mobile Testing: Experienced in Android Testing
